

Protalix BioTherapeutics to Reschedule Third Quarter 2020 Financial Results and Business Update Call for Friday, October 30

October 29, 2020

CARMIEL, Israel, Oct. 29, 2020 /PRNewswire/ -- Protalix BioTherapeutics, Inc. (NYSE American: PLX) (TASE: PLX), a biopharmaceutical company focused on the development, production and commercialization of recombinant therapeutic proteins produced by its proprietary ProCellEx[®] plant cell-based protein expression system, today announced that it has rescheduled today's conference call due to technical issues with a third-party provider. The rescheduled call to discuss the financial results and provide a general business update will take place on Friday, October 30, 2020 at 8:30 a.m. Eastern Daylight Time (EDT). The Company reported financial results for the third quarter ended September 30, 2020, and provided a business update on recent corporate and clinical developments in a press release issued earlier today.

Rescheduled Conference Call and Webcast Information:

Friday, October 30, 2020, 8:30 a.m. Eastern Daylight Time (EDT)
Domestic: 877-423-9813
International: 201-689-8573
Conference ID: 13712792

The conference call will be webcast live from the Company's website and will be available via the following links:

Please access the websites at least 15 minutes ahead of the conference to register, download and install any necessary audio software.

The conference call will be available for replay for two weeks on the Events Calendar of the Investors section of the Company's website, at the above link.

About Protalix BioTherapeutics, Inc.

Protalix is a biopharmaceutical company focused on the development and commercialization of recombinant therapeutic proteins expressed through its proprietary plant cell-based expression system, ProCellEx[®]. Protalix was the first company to gain U.S. Food and Drug Administration (FDA) approval of a protein produced through plant cell-based in suspension expression system. Protalix's unique expression system represents a new method for developing recombinant proteins in an industrial-scale manner.

Protalix's first product manufactured by ProCellEx, taliglucerase alfa, was approved for marketing by the FDA in May 2012 and, subsequently, by the regulatory authorities of other countries. Protalix has licensed to Pfizer Inc. the worldwide development and commercialization rights for taliglucerase alfa, excluding Brazil, where Protalix retains full rights.

Protalix's development pipeline consists of proprietary versions of recombinant therapeutic proteins that target established pharmaceutical markets, including the following product candidates: pegunigalsidase alfa, a modified version of the recombinant human α -Galactosidase-A protein for the proposed treatment of Fabry disease; OPRX-106, an orally-delivered anti-inflammatory treatment; alidornase alfa for the treatment of Cystic Fibrosis; and others. Protalix has partnered with Chiesi Global Rare Diseases, both in the United States and outside the United States, for the development and commercialization of pegunigalsidase alfa.
